I am happy to write this letter of recommendation for Adrian Bao. I have no doubt that Adrian's attention to detail and problem-solving ability will enable him to succeed in whatever career he desires.

Adrian was a student in my Programming and Problem-Solving class and I frequently used his code and test plans as examples for the class to follow. His test plans were extremely thorough and beautifully laid out. His code was well organized, easy to read and understand, and most importantly, it solved the stated problem and worked correctly. I was very pleased to see a student provide such professional quality code and test plans.

In every class I teach I look for the student who just 'gets it'. I look for that student who I would be happy to recommend for a job. Adrian was that student. The organization that hires Adrian will be happy they did.

Sincerely,  
David Freitag
